U.S. Patent and Trademark Office PTOL-303 (Rev. 4-05)

Continuation of 11. does NOT place the application in condition for allowance because: The applicant argues that Poole does not teach or suggest a method of distributing a plurality of documents as claimed in independent claim1. The Office respectfully disagrees. Poole provides the Inferencing capabilities of the Inference Engine (Poole, col.5, I.53-63) for resolving entity reference (Poole, col.7, I.50-60) and appended entity name (Poole, col.25, I.14-21, entity name corresponds to one content group of each document). Upon resolving all of the entity reference, the prepared document publishes as a printed form, an electronic form, or a Web or Internet form and distributes to the end-user (Poole, col.51, I.49-50) by implementing the distributed network approach (Poole, col. 2, I.41-42, in which publishes and distributes method corresponds to distributing the document). Similarly, claims 14, and 18 are rejected for the same reason set forth for the rejection of claim 1.
